

The following is a review of the best 3D driving games on the Android and iOS app store. What constitutes a good driving game? It's all about the realism of the environment, and how it reacts to your input. And while there are some that nail that ideal down pat, there are others that just don't quite get it right. This is why we've taken time to distill down some of the best 3D driving games for you — so you can take your pick without having to waste hours looking around. Check out the list below and find something to fit your tastes. Real Racing 3 Real Racing 3 is probably the best racing game on Android, and frankly quite possibly one of the best games on mobile in general. It boasts a truly stunning amount of detail and precision, and it's really fast too — especially on newer devices. The graphics are absolutely beautiful and you can even get into multiplayer races with other human opponents — which is always a good time. And while the app is paid, it does have unlimited playtime — so there's little reason to complain except for maybe some ads (which can be removed via in-app purchase). It's one of the most realistic driving games you'll find. What we love: Intuitive controls, graphics, and the overall experience What we loathe: Quite a bit of driving over hills, and the occasional crash. Not enough time control to build up speed. Trying to get a little speed going? The best way is to hit the gas and go as fast as you can. It's a simple formula that'll make you a top driver in no time. The best part is that it's not very difficult at all — since it's pretty much an arcade-style racing game, there's zero need for complex controls or complex maneuvers. The graphics are stunning, but boring. Just make sure to leave some extra time to explore the cities, as you'll find that they're just as real looking as the rest of the game. What we love: An absolutely stunning game that'll satisfy your need for speed. What we loathe: The occasional crash can get old, and slow play controls can be annoying to deal with. There's nothing about Need For Speed games that aren't pretty much identical — so if you want something different you'd better play something else. But this one is still worth checking out because it's so darn realistic. The graphics are superb, and the game is pretty much unrivaled in its ability to resemble a real-life racing game. And while graphics might not be everything, this game's good enough to leave you completely satisfied. What we love: Realistic driving environment plus insane stunts and a stunning car selection. What we loathe: The controls can be a little confusing at times, and while driving through hills can get old, it's not nearly as bad as it sounds. Still going to school? Take your time and hop into our best 3D driving games periodically to stay refreshed on your lessons.
